Fullstack Development

Preflight project - frontend

Github Repo

`npm create vite@latest`

`npm i dayjs @picocss/pico`

- Remove all `css` files

  `package.json`

- `` `./src/main.ts ``

- `` `./src/App.ts ``

- `vite.config.ts`

```
{
  "scripts": {
    "dev": "vite --host"
  }
}
```

Test with LocalXpose

Containerization

.env.test

.dockerignore

Dockerfile

nginx.conf.template

docker compose --env-file ./.env.test up -d --force-recreate --build

Push to Dockerhub

- Create an account at https://hub.docker.com.

- Create repository called `preflight-frontend`.

- Tag image
  - ⌨ `docker tag preflight-frontend [DOCKERHUB_ACCOUNT]/preflight-frontend:latest`

- Push image
  - ⌨ `docker push [DOCKERHUB_ACCOUNT]/preflight-frontend:latest`
